AHN WESTFIELD MEMORIAL
Hospital

AHN Westfield Memorial Hospital provides personalized, comprehensive care for each patient — with inpatient care available 24/7.

CARDIOVASCULAR SERVICES

We keep hearts beating with personalized treatment for heart failure, arrhythmia, pulmonary hypertension, and thoracic and lung disease.

- Patients benefit from cardiac education, screenings, prevention, rehabilitation, nuclear stress testing, EKG, and Holter monitoring.

DIAGNOSTICS SERVICES

We offer convenient, comprehensive ultrasound and other imaging services, along with IV infusions, and laboratory testing.

- At our Women's Wellness Suite, women receive bone density screenings and 3D mammograms from board-certified radiologists in a relaxed and private setting.

EMERGENCY MEDICINE SERVICES

We offer critical 24/7 access to emergency medicine, coordinating with EMS and emergency transport.

GENERAL MEDICAL SERVICES

We treat a wide variety of conditions, including allergies, diabetes, and digestive issues.

- Patients meet personally with a diabetes educator to learn skills to manage their diabetes.
- We use advanced therapeutic endoscopy and colonoscopy for gastrointestinal diseases and early detection of colorectal cancer.
- Our Wound Clinic focuses on the evaluation and treatment of chronic, difficult-to-heal ulcers, surgical wounds, and wounds from other causes.

PRIMARY CARE SERVICES

The Chautauqua Primary Care Clinic is located at the Chautauqua Institute. This clinic is open only during the summer season and is an extension of the main hospital. With preventive care and condition management, we coordinate care with specialists to keep our patients healthier.

REHABILITATION SERVICES

We offer physical therapy for injuries, post-operative conditions, pain management, spinal disorders, osteoporosis, and fall prevention. We follow the McKenzie Method® of physical therapy that uses comprehensive injury assessment to ensure the best possible path to recovery for patients.¹

SURGICAL SERVICES

Through the latest laparoscopic technologies, more patients have minimally invasive options for surgery, which may give them a faster recovery and less post-surgical pain.

- We provide innovative surgical techniques to help patients with complex hernias.
- Our orthopaedic clinic offers highly specialized care with orthopaedic surgery on-site.

TELEMEDICINE SERVICES

Telemedicine services are available for rheumatology and endocrinology.
