Allegheny Health Network

Allegheny Valley  
Hospital

AHN ALLEGHENY VALLEY

AHN doctors and clinical specialists work in multidisciplinary teams to provide personalized, comprehensive care for each patient — and access to clinical trials for the newest therapies.

### CANCER INSTITUTE

We treat many types of cancer with the latest advancements in surgery, radiation, chemotherapy, biologic therapy, immunotherapy, genomics, and pathology testing. We continue to adopt new technologies to improve results.

- Patient navigators help coordinate care in over 20 hospital and community locations.
- The newly opened AHN Cancer Institute — Allegheny General is the nucleus for research, clinical trials, treatment, and medical education.
- We collaborate with Johns Hopkins Sidney Kimmel Cancer Center to give streamlined and guided access to clinical trials and second opinions.

### CARDIOVASCULAR INSTITUTE

We keep hearts beating using multimodality imaging and treatments with new medicines, advanced hybrid procedures, and implantable devices to fight heart, thoracic, and vascular disease.

- AHN has the best heart transplant survival rates in the region.\*
- Robotic and minimally invasive surgery can reduce risk and speed recovery after coronary artery, aortic, vascular, and cardiac valve repair and replacement.

\*AGH has the highest one-month and one-year survival rates for adult heart (single organ) transplant patients performed between 1/1/2017 and 6/30/2019 among all facilities performing such transplants in the 16 westernmost counties of Pennsylvania. Data provided by Scientific Registry of Transplant Recipients (SRTR). Information available at [www.srtr.org](http://www.srtr.org).

### EMERGENCY MEDICINE

We offer critical 24/7 access to highly skilled emergency care and trauma specialists, coordinating EMS and transport through our Prehospital Care Service team.

- LifeFlight helicopters from five regional locations provide lifesaving care and fast patient transport.
- Comprehensive stroke centers, certified by the American Heart and American Stroke Associations for safety and quality, offer rapid response time and innovative treatments.

### PRIMARY CARE INSTITUTE

More than 300 AHN primary care physicians across 120 locations provide coordinated, preventive care and condition management.

- Same-day appointments, video visits, and online scheduling improve access to care.

### PSYCHIATRY AND BEHAVIORAL HEALTH INSTITUTE

We help patients regain control of their mental, emotional, and behavioral health through comprehensive assessment, customized therapy, and medication services.

- Patients can access care through inpatient and partial-hospitalization programs, outpatient counseling, and telepsychiatry.

### REHABILITATION SERVICES

Inpatient and outpatient rehabilitation helps patients gain the skills to resume daily activities and live more independently.

- We provide physical medicine, and physical, occupational, speech and language, and respiratory therapy.
- Traumatic brain injury rehabilitation teams include rehabilitation specialists, neurologists, psychiatrists, and surgeons. Therapies focus on concentration, memory, swallowing, balance, strength, and coordination to improve a patient's ability to think, walk, and talk.
