AHN FORBES
Hospital

AHN doctors and clinical specialists work in multidisciplinary teams to provide personalized, comprehensive care for each patient — and access to clinical trials for the newest therapies.

CANCER INSTITUTE

We treat many types of cancer with the latest advancements in surgery, radiation, chemotherapy, biologic therapy, immunotherapy, genomics, and pathology testing. We continue to adopt new technologies to improve results.

- Patient navigators help coordinate care in over 20 hospital and community locations.
- The newly opened AHN Cancer Institute — Allegheny General is the nucleus for research, clinical trials, treatment, and medical education.
- We collaborate with Johns Hopkins Sidney Kimmel Cancer Center to give streamlined and guided access to clinical trials and second opinions.

CARDIOVASCULAR INSTITUTE

We keep hearts beating using multimodality imaging and treatment with new medicines, advanced hybrid procedures, and implantable devices to fight heart, thoracic, and vascular disease.

- AHN has the best heart transplant survival rates in the region.*
- Robotic and minimally invasive surgery can reduce risk and speed recovery after coronary artery, aortic, vascular, and cardiac valve repair and replacement.

*AGH has the highest one-month and one-year survival rates for adult heart (single organ) transplant patients performed between 1/1/2017 and 6/30/2019 among all facilities performing such transplants in the 16 westernmost counties of Pennsylvania. Data provided by Scientific Registry of Transplant Recipients (SRTR). Information available at www.srtr.org.

EMERGENCY MEDICINE

We offer critical 24/7 access to highly skilled emergency care and trauma specialists, coordinating EMS and emergency transport through our Prehospital Care Service team.

- LifeFlight helicopters from five regional locations provide lifesaving care and fast patient transport.
- Comprehensive stroke centers, certified by the American Heart and American Stroke Associations for safety and quality, offer rapid response time and innovative treatments.

NEUROSCIENCE INSTITUTE

We are an accredited, national leader in providing advanced therapies, proven technologies, and innovative procedures to help patients with complex brain, spine, and neurological conditions.

- We use a patient-centered, multidisciplinary approach to diagnose and treat neurological disorders.
- Groundbreaking minimally invasive and robotic-assisted procedures help us enhance patient safety and lower risk.

ORTHOPAEDIC INSTITUTE

Our high-quality specialized care for orthopaedic injuries and complex musculoskeletal conditions help patients regain mobility and health.

- For joint replacement, we use muscle-sparing, minimally invasive, robotic-assisted surgery with advanced pain management.
- New therapies for comprehensive, coordinated concussion care offer patients personal treatment plans so they can get back to everyday activities.
- Elite sports medicine specialists help athletes overcome injuries and return to the game.

WOMEN'S INSTITUTE

We care for women throughout their lives with obstetrics, midwifery, primary care, breast care, midlife care, advanced gynecologic surgery, pelvic health, bone density testing, and all medical subspecialties.

- Here, women experience personal nursing care and family-centered childbirth with obstetricians and midwives in our spacious birthing suites.
- Pregnant and postpartum patients with substance use disorder get help through Perinatal Hope, receiving counseling, medication-assisted treatment, and obstetric care, all at the same appointment.
- Premature or fragile infants are cared for in our Level II neonatal intensive care unit (NICU).
