FAST FACTS

AHN SAINT VINCENT
Hospital

AHN doctors and clinical specialists work in multidisciplinary teams to provide personalized, comprehensive care for each patient — and access to clinical trials for the newest therapies.

CANCER INSTITUTE

We treat all types of cancer through surgery, radiation, chemotherapy, biologic therapy, immunotherapy, genomics, pathology testing, and imaging studies.

- Our \$25 million Cancer Institute on the Saint Vincent Hospital campus offers comprehensive, integrated cancer care, personalized by nurse navigators.
- We use precision radiation therapy, including brachytherapy and a linear accelerator, for respiratory motion management, stereotactic body radiation therapy, and stereotactic radiosurgery.
- Through collaboration with AHN and Johns Hopkins Kimmel Cancer Center, we offer advanced care and give streamlined and guided access to clinical trials and second opinions.
- We are part of one of Pennsylvania's most advanced cell transplant programs.

CARDIOVASCULAR INSTITUTE

We keep hearts beating with new medicines, advanced hybrid procedures, and implantable devices. We provide personalized treatment for heart failure, arrhythmia, pulmonary hypertension, and thoracic and lung disease. We also offer:

- Interventional and minimally invasive cardiac procedures for irregular heartbeat, including cryotherapy and radio frequency ablations.
- Cutting-edge procedures, including TAVR and implantation of the Watchman™ device.
- Cardiac education, prevention, and phased cardiac rehab.

EMERGENCY MEDICINE INSTITUTE

We offer critical 24/7 access to highly skilled emergency care, and 39 private rooms, including:

- A \$50 million emergency department with streamlined triage and faster imaging, areas dedicated to behavioral health care, resuscitation, and a separate waiting room.
- LifeFlight helicopters for lifesaving care and fast patient transport.

NEUROSCIENCE INSTITUTE

We integrate neurology and neurosurgery for innovative, medical and surgical treatment for patients with complex brain, spine, and neurological conditions, movement disorders, tumors, or stroke.

- We help patients manage headaches, back, and neck pain with therapy, medications, or surgery.
- Precision robotic technology and 3D mapping are used during neurosurgery on the spine and neck.

ORTHOPAEDIC INSTITUTE

Our high-quality specialized care for orthopaedic injuries and complex musculoskeletal conditions helps patients regain mobility and health.

- For joint replacement, we use robotic-assisted surgery with advanced pain management.
- We perform over 2,000 procedures with Mako SmartRobotics™ robotic assisted devices.
- We are the only hospital in the region to offer hip preservation surgery for young athletes and minimally invasive, muscle-sparing direct anterior hip replacement.
- Our comprehensive sports medicine team of trainers, physical therapists, physicians, and surgeons get athletes back to the field quickly.

WOMEN'S INSTITUTE

We care for women throughout their lives with well-woman services, obstetrics, gynecology, primary care, breast care, advanced gynecologic surgery, bone density testing, and all medical subspecialties.

- Families enjoy personalized nursing, and family-centered childbirth in our spacious birthing suites with pullout sleep sofas, a Level III NICU, and midwife options.
- Babies who need highly specialized care for rare or complex conditions have access to breakthrough fetal procedures from specialists at Johns Hopkins Center for Fetal Therapy.
- We have a comprehensive outpatient center for breast health, gynecologic oncology, maternal fetal medicine, genetic counseling, and plastic surgery.

Comprehensive, high-quality care, close to home

Saint Vincent Hospital has served the people in the Lake Erie region since 1875, with a quality of care and service that is second to none. Our expansion and ongoing renovations strengthen our tradition of excellent and transformative health care. We work with our region's employers to keep their employees healthy and productive.
