The Wexford Health + Wellness Pavilion offers first-class outpatient surgical services in a convenient and comfortable environment. The state-of-the-art multi specialty center provides personalized attention and greater efficiency.

The surgeons at the Wexford Health + Wellness Pavilion operate in one of four new, state-of-the-art operating rooms equipped with the most advanced equipment. In addition, perioperative surgery consultations are provided to ensure optimal health prior to surgery.
General and Minimally Invasive Surgery

The surgeons at the Wexford Health + Wellness Pavilion provide a full range of general surgical procedures. Often working in conjunction with colleagues in other specialties, the staff emphasizes collaboration with referring physicians and works with the patients to ensure all of their questions and concerns are addressed.

Minimally Invasive Surgery

Allegheny Health Network surgeons were among the first to use minimally invasive approaches and have accumulated some of the largest clinical experiences with laparoscopic surgical techniques in the country.

General and Minimally Invasive Surgical Options include:

- Abdominal surgery
- Bariatric surgery
- Breast reconstruction surgery
- Bowel surgery
- Bypass surgery
- Gallbladder surgery
- General surgery
- Hernia surgery
- Plastic, cosmetic and reconstructive surgery

Patients also have access to surgical consultations with doctors that specialize in cardiothoracic surgery and surgical oncology.

Plastic Surgery

The Wexford Health + Wellness Pavilion provides comprehensive reconstructive and aesthetic surgical services, ranging from cosmetic surgery to complex reconstructive procedures. The physician team is equipped to perform surgery on any portion of the anatomy, including, but not limited to:

- Skin (including skin cancer, scars, burns, birthmarks, tattoo removal)
- Maxillofacial (the facial skeleton)
- Congenital anomalies

Reconstructive Surgery

Reconstructive surgery is performed on abnormal structures of the body, caused by congenital defects, developmental abnormalities, trauma, infection, tumors or disease, to improve function.

Procedures include:

- Breast reconstruction
- Autologous fat grafting (used in breast reconstruction as well as some cosmetic procedures)
- Reconstruction of facial fractures
- Nasal reconstruction (cosmetic and traumatic)
- Skin cancer excision and reconstruction (basal cell, squamous cell, and melanoma)
- Skin lesion excision (new, dysplastic nevi, etc.)
- Keloid treatment
- Scar revision
- Surgical management of lacerations

Hand and Upper Extremity Surgery

Many advancements have been made in recent years in treating patients with hand injuries, degenerative disorders and birth defects of the hand. The surgical team at the Wexford Health + Wellness Pavilion has undergone intensive training in these advanced techniques.

Procedures include:

- Carpal tunnel repair
- Dupuytren's contracture
- Microvascular procedures
- Reversing the effects of rheumatoid arthritis by repositioning tendons or implanting artificial joints.

Cosmetic

Cosmetic procedures include surgical or non-surgical treatments to improve the appearance of the face and entire body. In general, cosmetic plastic surgery may be recommended for healthy individuals with a positive outlook and realistic expectations to alter physical features to reduce the signs of aging.

Procedures include:

- Juvederm and other injectable fillers
- Facial hair removal
- Liposuction (cosmetic and occasionally reconstructive)
- Rhinoplasty
- Eyelid surgery
- Facial rejuvenation
- Breast augmentation

Designed with the Patient’s Needs in Mind

A valet service and open-air parking provide convenience for referring physicians and works with the patients to ensure all of their questions and concerns are addressed. A single electronic record ensures efficient and accurate communication between the physician and surgery team to reduce patient stress.

A Dedicated Physician Team in Your Community

The experienced team of physicians is dedicated to providing patients with the most advanced treatment options right in the community.
